DETAILED ACTION

*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5 and 7 drawn to a method for inducing an anti-viral response in vivo, classified in class 435, subclass 131.1.

Upon election of Group I, Applicant is additionally required to elect either antibody or a lymphotoxin- $\beta$ -receptor/Ig fusion protein to be examined on the merits. This requirement is not to be construed as a requirement for an election of species, since each of the reagents recited in alternative form is not a member of a single genus of invention, but constitute an independent and patentably distinct invention.

- II. Claims 6-8, drawn to a method for inducing an anti-viral response by using a lymphotoxin- $\beta$ -receptor/Ig fusion protein in vivo, classified in class 424, subclass 85.1.

The inventions are distinct, each from the other because:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and II are directed two different methods for inducing an anti-viral response, e.g. the group I uses antibody, whereas the group II uses a fusion protein. They are not disclosed as capable of use together and are structurally and functionally different.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
